Professional Summary

GenAI Developer with 3+ years of experience building intelligent applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and scalable cloud solutions. Skilled in designing AI-powered systems that improve automation, insights, and user experience.

Technical Skills

Languages: Python, JavaScript

GenAI & LLMs: OpenAI, Azure OpenAI, Gemini, Hugging Face Transformers

Frameworks: LangChain, LlamaIndex

Concepts: Prompt Engineering, RAG, Fine-tuning, Embeddings

Vector Databases: FAISS, Pinecone, ChromaDB

Cloud: Azure, AWS (EC2, S3, Lambda)

Tools: Docker, Git, FastAPI, Streamlit

Professional Experience

GenAI Developer | TechNova Solutions | 2022 - Present

- Built and deployed LLM-powered chatbot using RAG pipeline reducing support queries by 40%.
- Designed prompt optimization strategies improving response accuracy by 25%.
- Integrated vector databases (Pinecone) for semantic search across enterprise documents.
- Developed scalable APIs using FastAPI for AI inference services.

Key Projects

1. Intelligent Document Q&A; System

- Built a PDF ingestion pipeline using LangChain + FAISS for semantic retrieval.
- Implemented RAG using OpenAI GPT models achieving high precision answers.
- Enabled multi-document querying for enterprise knowledge systems.

2. AI Code Assistant

- Developed GenAI-powered coding assistant using GPT APIs.
- Provided real-time suggestions and debugging support.
- Built UI using Streamlit for developer productivity.

3. Customer Support Chatbot

- Designed chatbot using Azure OpenAI and LlamaIndex.
- Reduced human agent workload by automating FAQs and workflows.

Education

B.Tech in Computer Science | XYZ University | 2019 - 2022

Certifications

- Microsoft Certified: Azure AI Engineer Associate
- Generative AI Specialization (Coursera)
