

Vilas Rakhe

Professional Summary

Highly skilled Cybersecurity Specialist with strong expertise in network security, ethical hacking, vulnerability management, SIEM monitoring, and incident response. Proven ability to identify, analyze, and mitigate advanced cyber threats. Hands-on experience with enterprise security tools, cloud security practices, and compliance frameworks.

Core Skills

• Network Security • Penetration Testing • Vulnerability Assessment • Incident Response • Threat Intelligence • SIEM (Splunk, QRadar) • Firewalls & IDS/IPS • Cloud Security (AWS, Azure) • Malware Analysis • Risk Management • Compliance (ISO 27001, NIST)

Education

M.Sc in Cybersecurity (2020–2022)

Focused on ethical hacking, digital forensics, cryptography, and secure system design.

B.Tech in Computer Science (2016–2020)

Core subjects included networking, operating systems, database security, and programming.

Certifications

• Certified Ethical Hacker (CEH) (Expected) • CompTIA Security+ • Cisco CyberOps Associate • Microsoft Security Fundamentals

Professional Experience

Cyber Security Analyst – SecureTech Solutions (2022–Present)

• Performed penetration testing on web and network systems using tools like Metasploit, Burp Suite, and Nmap. • Monitored and analyzed security events using SIEM tools (Splunk, QRadar). • Investigated incidents including phishing attacks, malware infections, and unauthorized access. • Implemented security policies, firewall rules, and endpoint protection solutions. • Conducted vulnerability scans and provided remediation strategies.

Information Security Intern – CyberSafe Labs (2021–2022)

• Assisted in SOC monitoring and log analysis. • Performed risk assessments and documented security gaps. • Supported incident response and root cause analysis. • Worked with Wireshark for traffic analysis and threat detection.

Key Projects

1. Network Intrusion Detection System (IDS)

Designed and implemented a machine learning-based IDS using Python to detect anomalous traffic patterns. Improved detection accuracy by 30%.

2. Web Application Vulnerability Scanner

Developed a custom scanner capable of identifying SQL injection, XSS, and CSRF vulnerabilities. Automated scanning reduced manual effort significantly.

3. Malware Analysis and Sandbox Environment

Built a secure sandbox to analyze malware behavior and reverse engineer binaries using tools like IDA Pro and Ghidra.

4. Security Operations Dashboard

Created a dashboard integrating SIEM alerts for real-time monitoring and incident tracking.

Tools & Technologies

Kali Linux, Metasploit, Burp Suite, Nmap, Wireshark, Splunk, IBM QRadar, Nessus, OpenVAS, AWS Security Hub, Azure Security Center, Python, Bash scripting

Achievements

- Successfully reduced security incidents by 25% through proactive monitoring.
- Recognized for identifying critical vulnerabilities in enterprise systems.
- Completed multiple hands-on capture-the-flag (CTF) cybersecurity challenges.
